Greetings, dear viewers, on my channel of Liubov Zavalniuk. Today our guest is Ihor Mekheda.
Mr. Ihor, your predictions are coming true. You said that conflicts would be everywhere. This is a year of dynamic changes.
Right now we see that in Ukraine there are wild changes, first of all with energy. We are going through quite a harsh transformation.
Conflicts are beginning in the world. Trump is starting to stir the waters. What can happen next and why is this happening right now?

The thing is, this is indeed a very interesting question.
We have said with you that according to the beliefs of many spiritual teachings, the life of humanity is divided into epochs.
The duration of these epochs varies. Well, European, for example, esoteric societies say that it happens once every 12,000 years.
While, for example, shamanic societies believe that it happens approximately once every 144,000 years.

Uh-huh. That is, from 12,000 to 144,000 years — all of this is taking place. And the change of epochs is happening.
But no matter what the duration of these epochs is, all spiritual scientists say that if we translate it to our calendar, the one we currently use, then the period from 2011 to 2025 is the interval between two epochs.
The old epoch will end, the new one, uh, begins. So 2026 is already the first year of the new epoch.
It already starts to influence the destiny of humanity.

And we talked with you that if we take 2026 and add up all the digits, it will be one.
And according to the ancient Slavic Vedic calendar, year 7534 also adds up to one.
That is, we see that this is the first year of the new epoch, which will last at least 12,000 years, at most 144,000.
And new laws will begin to operate.

They say that we were in the period of planetary night. In fact, we were sleeping and seeing nightmares.
Well, what is Kali Yuga? That is, Brahma first creates Satya Yuga when he wakes up, gains strength from the Supreme, and at first everything is good in his universe.
This is Satya Yuga — it's morning. Then, in the middle of the day, he gets a bit tired, but can still hold the situation somehow — this is Dvapara Yuga.
Then evening — this is Treta Yuga, and then he can't hold on anymore, falls asleep and immerses himself in the Supreme to gain new strength.

Uh-huh. And that's why what is Kali Yuga? All divine forces are sleeping.
And therefore, uh, a nightmare comes, a koshmar, as our ancestors said in the ancient Slavic language — koshmary are those nav spirits that show scary pictures.
These pictures begin to materialize in the world.

Now the small planetary Kali Yuga has already passed, the planetary night is over, the planetary day is beginning, so all the night nightmares should start to dissipate.
And that is exactly what has begun. The nightmares are starting to dissipate.

Let's take, for example, the same Venezuela.
What happened there? The thing is that the Russians brought this dictator Maduro to power.
By the way, I spoke with Venezuelans. I know many Venezuelans, some of them live in Ukraine.
I talked with those who live in Spain, because it's a Spanish-speaking country. They moved there escaping that same Maduro.
The Russians supported him. He was a bus driver. And uh-very interestingly, in South America all people are mystical, they believe in the cult of ancestors, in spirits.

They are very spiritual, very mystical countries. The most mystical is considered to be Mexico, but that's already North America, but South American countries are also very mystical.

And he climbed on the roof of the bus at Chávez's funeral — the bus he used to drive — and said:
"And the previous dictator Chávez appeared to me in a dream."
And he looked like a blue bird that was inside water.
And he told me that I must be president and handed power over to me.
And after that he also said that his grandfather appeared to him in a dream in spring and also said: "Go become president."
Since Venezuelans initially did not recognize Maduro, but because they are mystical, after hearing all this they thought:
"Well yes, these are the messages from the world of ancestors, they won't lie."
And they voted for him, hoping that life would improve, because under Chávez Venezuela was a very rich and very strong state.
Well, Chávez somewhat extinguished it, but they thought Maduro would fix the situation.

Instead, as the Venezuelans themselves say, Maduro began to crush them with tanks and organized hunger.
After that Russia could take Venezuelan oil for pennies and sell it to other countries three times more expensive.
And thus the budget of the Russian Federation was replenished.
That is, there was very strong Russian influence there.
And what did they bring on those tankers, as it turned out? Well, they weren't taking oil.
And what were they bringing there? They were bringing weapons, because they wanted to deploy this weaponry in Venezuela and strike the United States.

Uh, that is, Maduro was exactly that — a dictator. Well, a bad person.
The fact that Trump did this is very good both for South America, because Venezuela was a constant source of tension,
and for the Venezuelans themselves. They are rejoicing, they are dancing.
I specially talked with them. They say: "There has never been a happier event."

And for Ukraine this is very good in general, because Russia has lost a huge amount of money that will now not go to financing the war against us.
That is, Trump did a good thing.
Uh, now the fate of the entire South America will change for the better.

The thing is that in reality politicians are just instruments.
Well, I already gave one lecture today. Let's take World War II.
It is believed that behind Hitler stood evil forces, dark forces.
Even in the Reich Chancellery, as they claim, they found draft agreements with various demonic forces of different religions.
That is, Hitler was fed by demonic forces so that he would kill many people.

Uh, what did he do? The same with Stalin. Stalin is the second one. Demonic forces were also involved there.
And the fact that they quarreled with each other may actually be good for humanity, because if they had united, it could have been worse.

And it is believed that the same Winston Churchill was infused with divine forces. And the Allies.
And that's why they won — because divine forces are always stronger than diabolical ones.
And this is exactly the eternal theme of sura-asura.

Suras are gods. These are the manifestations of the Absolute. Different gods and goddesses who are manifestations of the Absolute.

And there are also asuras.
Asuras — if translated from Sanskrit — are those who are like gods, but are not gods.
That is — demons.

And so there are suric people, for example all our masters who cooperate with us on this channel and you and me,
and there are asuric people.
What is the difference?
Suric people want the common good. They want to unite, to build something, to protect something, to create something,
to plant some trees, to save ecology.
And they constantly do this, create, create, create, support each other and manifest something divine within themselves.

While asuric people are only interested in I, ego.
I need to eat, I need to drink, I need power, I need a house, I need this and that — everything only for myself.
Other people are not taken into account, because God also…
That is exactly what asuras are.

And in fact there are both kinds of people. And the struggle between them is constant.
How will it all end? The 10th incarnation of Vishnu. Dashavatara. The 10th incarnation — Kalki Avatar.
He must come with a sword and simply physically destroy these asuric people.

And by the way, if you think that this is only a Vedic concept — it is not.
This is also a Christian concept.
Saint Augustine said that there are two cities: the City of God and the city of the devil.
People who will live in the City of God and in the devil's city, and now they are mixed in humanity.
And then those who had God within them will be taken to the divine city, and those who did not have God within them will be taken to the devil's city.
After that God will destroy the devil's city.

So you see, Augustine's concept is by the way the same Vedic one, and that is exactly why it is disadvantageous for asuras.
And that is why they try in spiritual seminaries not to allow the study of Augustine's work about these two cities at all, because he saw everything correctly.
Vedic concept.

And by the way, now I see that people are turning to various benevolent gods, interacting with them.
Well, this is good for restoration.
But in order for our adversaries to start crumbling, we need to start turning to Kalki Avatar,
because even now his power can act through us and kill asuras with a spiritual sword.

And that is exactly what is happening right now.
You see, in Venezuela — who essentially is this Maduro and his entourage?
This is an asura who took advantage of people's beliefs in order to kill for Iran the same thing.
Those who now rule Iran — I don't even consider them Muslims at all.
They turned upside down everything that is written in the Quran.

For example, they are now killing protesters.
While the same Quran says that one Muslim should not kill another for the sake of power.
That is, they have already violated all the commandments of the Quran.
These are some kind of servants of Iblis.
Well, that is the name of the devil in Islam — Iblis.

Servants of Iblis wearing a Muslim mask. Do you understand?

The same way as some of ours, especially, let's say, the Moscow Patriarchate — these are also not Christians, but demons in the mask of Christians.
And we finally need to understand that, as it is written in the Bible, demons will rule the temples.
They will disguise themselves as saints.

What do we see in the example of the Ayatollahs?
What do we see in the example of the Moscow Patriarchate?
They all disguise themselves as saints, supposedly believing in God.
In reality they believe in no one except themselves.
Everything they do is to strengthen their own power and wherever they can — they drag away money and hide it so they have a lot of money.

That is the asuric approach.
That is, they are asuras, therefore they are subject to destruction by the same Kalki Avatar.
And we already need to turn to him, because it is in this epoch that he must begin to act, and then he will come to Earth.

Mr. Ihor, the situation in Iran.
We also see that now the Islamic egregore is undergoing cleansing and reformation.
What awaits it? People are massively converting to Christianity.
Will the Islamic egregore be destroyed or somehow transformed?

Look, it will be transformed, you understand?
Look at how people live in the United Arab Emirates or in Turkey.
There is no such thing as someone killing someone else or putting someone in prison.
Uh, people live a normal life there.
That is, it shows that it is possible to live a normal life.

By the way, there are several religions in Iran.
Everyone thinks that there are only Christians and Muslims there.
But don't forget that this is the homeland of Zoroastrianism, that Zoroastrianism was widespread there, the great prophet Zarathustra.
And now many Parsis live there, that is, fire-worshippers, that is, Zoroastrians, whose sacred book is the Avesta — they live there.
And they resisted — when there were still attempts to Christianize Persia before Islam, then to Islamize it — they did not give up their faith.
They exist. They have their own temples, their own cities, their own settlements.
And the Iranian authorities cannot do anything to them. Parsiism exists.

And by the way, a very large number of Parsis also live in India.
Millions of Zoroastrians still exist.
We have quite popular Zoroastrian Avestan astrology. People study it.

There are also small local cults, such as, for example, Yazidis and others.
There are many religions there.
And now they are all starting to say: how is this possible? Why should only Shia Islam rule?
Where is Sunni Islam, for example? In Islam there are two big branches — Shia and Sunni.

For example, in the United Arab Emirates — they are Sunnis.
Now look — where are the Emirates, where is Iran?
Uh, Shia Islam suppresses not only other religions, they also suppress the same Sunnis — other Muslims.

And already all religious directions have said:
“How long can this go on? Give freedom to all beliefs. All beliefs must be represented.”

Yes, all religions will be transforming.
And by the way, this is an ancient Tibetan prophecy that one day there will be a great spiritual unification of all existing religions, which will transform.
It will be called Ayyalunta.
And in this Ayyalunta each religion will first be like a petal in a flower,
and then they will merge into something single.

Because in reality, if we analyze the commandments, they are almost the same in all religions.
And this creates the possibility of uniting religions in the future.
And this process will happen in the new epoch. It has already begun.

For example, if we come to the same Brazil, then first of all there are local Indian shamans.
Secondly, Catholicism was once brought to Brazil.
Slaves were brought to Brazil to work on plantations, and they brought with them the African religion of Ifá and Voodoo.
And all these religions that were brought to Brazil — they merged.
There are a lot of religious communities where they recognize both the indigenous religion, animism, shamanism, Ifá, Voodoo, and Catholicism.
And all this mixed together and completely new religions were created.

Such religions are called syncretic.

By the way, such a process will also happen in Ukraine. It is already happening.
The religion of the ancient Trypillians, the Vedic religion of the Slavs, Scythian faith, Celtic, Cimmerian — everything that existed on our lands,
we are now reviving all these faiths, they are beginning to connect.
And we see that the same moral principles that, for example, the Trypillians carried, do not differ in any way from the principles carried by the Vedic faith of the Slavs.
That is, the theology is almost the same, the commandments are the same, and in our consciousness they are beginning to unite.

A similar process, by the way, happened in Cambodia.
At first they were animists, then they accepted Hinduism, but when accepting Hinduism they did not abandon animism — that is, belief in spirits and interaction with nature spirits,
and then they also accepted Buddhism.
Now all this has mixed and some new religion is forming.

Thailand, by the way, does not understand the processes that are happening in Cambodia, because Thais are purely Buddhists.
And here three religions are merging: animism, Hinduism and Buddhism.
I come to a Buddhist temple and see a Shiva lingam there and pour water on it. This is normal for Cambodia.
In another country — what are you doing?
Or, for example, in a Buddhist temple there is a statue of goddess Lakshmi, in a Hindu temple there is Buddha, and so on.
Everything is normal.

You know, this process will happen throughout humanity.
Religions will transform and merge into something new.
Many religions — they will all unite.

We understand that it is impossible to completely destroy any religion,
but we can transform the spiritual potential that is embedded in them into something better.
And we can unite different spiritual currents.

And by the way, even the Orthodox prophets of the last century from different Orthodox churches spoke about the fact that different religions will unite.
They see it this way in the future. There will be a great such system.
But the Christianity of the Moscow Patriarchate will not join that system at all.
It must fall, transform then, and if it does join — it will be the very last religion among all that exist.

Well, for example, Sikhism is actually a combination of Hinduism and Islam. It has already merged in Sikhism.
There are commandments of both kinds. Normal people.

Uh, Mr. Ihor, what can you say regarding the geographical distribution?
There is an impression that Trump is now forcing Europe to kneel and ask for protection under the wing of America.
Right now he is giving Europe the opportunity to feel its weakness so that later, like a knight on a white horse, he can come galloping and say: “We are uniting, we will be together.”
He himself is pushing Europe toward conflict with Russia by his actions, by his refusal.

It is clear that Trump will not abandon Europe.
And Latin America — is it true that it is needed by Trump in order to withstand the confrontation with China?

The thing is that China, despite being considered some dangerous force, is not actually that strong.
Why? It does not have the potential to rule the whole world, in reality.
It is very dependent on Europe itself, on America itself.
They have 3 trillion dollars in trade with Europe and America.
China produces goods that it sells there.
If it goes against them and its goods stop being bought — the Chinese economy will collapse immediately.

The Chinese are not stupid enough not to understand this.
Uh, so yes, China will not claim world domination.
On the contrary, I think that what China will do — because now Russia is weakening and inside some countries want to leave the Russian Federation, especially those in Siberia —
China can calmly take them under its wing and take all the territories without war, you understand?
And become very rich on it.
And it will have enough work for many years to process and build all this, if it happens that way.

Uh, and let it just manage to make those territories prosperous.
Then all resources will be absorbed by them.
Therefore, to say that China will start a world war and so on — no, it won’t.
Uh, well yes, they tried to buy Venezuelan oil from Venezuela.
They bought, they bought from Venezuela and bought from Russia, because Russia was the intermediary.
Now they will buy the same volume of oil directly from the United States.
That is, for China nothing will change. Only from whom they buy will change.

Therefore, I don’t think that China so strongly desires a third world war or some redistribution of the world in its favor.
China will rather negotiate. You see that China has been negotiating with everyone all these years.

Uh-huh. In fact, it was negotiating.
The bad thing is that they have communist ideology.
I, in place of the Chinese leadership, would take Daoism as the state religion.

Uh, and by the way, they are actually doing many things according to Daoist principles.
So why, uh, let's say, confront and kill people, if you can eventually take the same Siberia calmly, without victims, calmly take it in another way,
because the Dao De Jing is a very interesting book.

And by the way, Daoism is very close to Hinduism.
Pangu is Purusha, Dao is Brahman.
That is, if we translate Chinese terms into Sanskrit, we will see that it is, well, completely the same religion as Hinduism.
And possibly Shakyamuni, observing neighboring India, took all this for himself — the immortal saints and everything they have.
Well, it will be a copy of Hinduism.

And if they really followed Daoist rules, China would be a completely different country — normal, prosperous, integrated into the world community.
But since it is communist, as we have shown, all these delusions, it is all made up — therefore they have catastrophe after catastrophe.
Now a catastrophe in the housing sector, now some natural catastrophe, now something else.
They constantly have various catastrophes happening because they did not accept Daoism as the state religion.
If they accept Daoism instead of the communist worldview, everything will be fine for them.
And for humanity it will also be good.

Uh, Mr. Ihor, and what about Ukraine — right now we are going through a very hard trial.
Trial by cold, trial of unity, trial of endurance.
It is like a very tough exam of fate for us, for the military, for the civilian population.
What awaits us? What do the stars predict for us now?

Look, the fact that they will attack — we knew that.
And how many times have they already attacked in the last four years.
The war has already lasted longer than the war between the Third Reich and the Soviet Union.

Uh-huh. Already longer. Yes, we endured four years — we endured. And we will endure here too.
People find ways to endure, to warm up. They support each other, visit each other.
They come up with something with generators, they come up with something — they go to villages, to dachas, to heat the stove with whatever is available in the village, some firewood.
That is, people adapt and survive, survive and will survive.
And Russia cannot do anything — because all these attacks are just, well, window dressing, like with this "Oreshnik".

It turned out that all the parts, uh, which, by the way, this is not even "Oreshnik". There is no such missile.
It was called differently in the Soviet Union.
And when they looked inside — there are gyroscopes from 1961, uh, there are still vacuum tubes like in receivers from the last century.
That is, parts from the 60s. What kind of new missile is this?
They are simply using those developments that remained in warehouses after the Soviet Union.

And after the collapse of the Soviet Union they did nothing new, because they can't — after all, the Soviet Union consisted of 15 republics that are now independent countries,
and another 42 countries that were part of the Council for Mutual Economic Assistance.
Uh, that is, there were so-called 41 countries of developed socialism plus 15 republics.
And a very large number of people from these countries worked intellectually and physically to create something.

And indeed the Union created something. Well, at least it created a space program then.

And after the Union collapsed — where there used to be 41 + 15 countries, that is 56, there remained one. And all the smart people scattered all over the world, because everyone wants to earn something, support their families, give children education.
They all scattered around the world, took citizenship of different countries and started working for those countries.
And who remained? Those who can't do anything remained.

And we see that such missiles…
This "Kedr" missile was called that in Soviet times, and now it became "Oreshnik" because the main Russian dictator has bad memory — he couldn't remember "Kedr" — said "Oreshnik",
and then it became called Oreshnik.

That is, it's all unserious today.
When the United Nations discussed this issue, the whole world laughed at this "Oreshnik".

Uh, and it's not even certain that it can carry a nuclear charge. Not certain, because it's a very old missile. It's actually a laboratory sample from 1961. It can fall right after launch and blow up themselves.
By the way, not bad.
But we don't need to be afraid. It's all a circus to make us scared, because, well, the same thing — if a person gets scared, they start retreating from the battlefield and don't live long.

Uh, and that is exactly the psychological moment — to frighten.
This moment existed already in the First World War, when the White Guards built huge such tanks.
And the Red Army ran away from those tanks because they looked like elephants walking.
And horror — they all ran.
And there were many such moments in the First World War, even not for some success on the battlefield, but to frighten the opponent,
because a frightened opponent either dies or runs away.

The thing is — when the Titanic sank, many people were saved in lifeboats.
Three hours later the Carpathia arrived. They picked up people from the lifeboats.
Half of them were already dead.
From what? They were afraid that now a storm would start, that icebergs would crush them, that something very bad would happen to them.
They began to be afraid — and fear at sea kills in two hours.

By the way, the same in the desert or in the mountains.
A person got scared — and they are already dead.
Whether in mountains, desert or sea.
Psychologists conducted such research.
Therefore, to destroy a person it is enough to frighten them strongly.
But if we allow ourselves to be frightened, then first of all we weaken ourselves, and we can even kill ourselves with our own fear.

Therefore we must not be afraid, but resist internally.
Who is not afraid, who resists — that one wins, that one will be alive, that one will pass all trials and everything will be fine.

Mr. Ihor, what can strengthen our inner core? Are there any practices? Are there any prayers that help to be braver?
I know "Om Triyam Bakam" mantra that helps in such emergency situations.

What can you advise Ukrainians?

Look, here it is better to use affirmation.
First, we rely on Om, because, uh, Om is the Absolute itself in sound,
but there should be an affirmation:
“He who is within me is stronger than everyone who is in the world.”

By the way, this was first written in the Vedas, in the Mahabharata.
Then Christians repeated it and other religions also repeated it.
So in many religions it is: He who is within us is stronger than everyone in the world.
And who is within us? God.
And where is He located? The same Mahabharata says — in the heart chakra (anahata) of every living being there is the greatest presence of God.

Therefore we affirm the divine presence in the heart chakra of each of us, we affirm —
after that we can even see with spiritual vision golden radiance,
and after that we sing Om and say that He who is within us, that is God, is stronger than everyone in the world.

That is — the inner world becomes divine and the outer world, which is a reflection of the inner, the evil is destroyed,
and divine forces begin to appear in the events around us.

And we must refuse. Well, there are 12 temptations if we take the Vedas:
fear, uh, guilt,
uh, uncertainty,
uh, unwillingness to manifest one’s talent from God,
apathy, depression, laziness, envy,
uh, not transmitting information, distorted transmission of information,
not saying what you should say or want to say,
illusions and excessive attachment to something.

These are temptations — if we say they are external, they come from asuras.
If inside we say: “No, I refuse to accept fear, I refuse to accept guilt, I refuse to accept depression and so on, I refuse” —
then as soon as you refuse, God Himself begins to support your choice.
And asuras stop the broadcast, and then our strength grows and events begin to develop in our favor.

All events — starting from health, so we can endure this cold, ending with events at work,
and so that our defense forces suffer fewer losses and destroy the enemy,
and so that we have new weapons, and so that the enemy falls, surrenders, gets scared —
let him be the one who gets scared, not us.
And everything will be fine.

From the point of view of karma — how is it better for Ukrainians now to pass this karmic period?
Many people started feeding birds. Someone helps animals, someone helps people,
someone donates to the Armed Forces, someone sews warm clothes for the Armed Forces.
How do all these things help us to reset, to cleanse our ancestral karma?

Very simple. Karma is a very simple law.
Some researchers write nine volumes about karma.
I look at these nine volumes. I don’t understand how one can stretch such a simple thing so much.

What is karma?
Every impulse that we emit into the universe — whether on the spiritual plane or on the material one — for example, feeding birds — it goes into the universe, makes a big circle and returns to the same point from which it came.

That is — we fed one bird, a second, a third, a fourth.
Vectors are created. They go around the universe and return to us.
And we receive good events in our life at least three times more than we gave.
And in some cases even ten times more.

And to create good karma — that is, so that higher forces constantly help in the spiritual and physical world and life gets better —
you need to do all this.
Everything you can — do it from a pure heart with love: feed birds, animals, help the Armed Forces.
All this must be given from a pure heart.

And the more such vectors are built — the better karma becomes.
It improves not in a thousand years and not in the next life — already now some people see results in 2–3 days.
Therefore this is exactly what needs to be done — constantly emit vectors of goodness and karma…

They say that this year is special in terms of prayers.
And this year many people will go to do kora, many people order prayers in order to work on their soul, to work again on some karmic moments.
Why is this year so important for spiritual development?

Because this is considered the first year of the new epoch.
And in general it should always be done.

I will explain to our viewers what kora is.
Yes, most people think that kora is circumambulation around the sacred Mount Kailash.
Yes, indeed, that is also kora, but not the only one.

The thing is that it is considered — in Hinduism, in Buddhism, in Lamaism and other world religions that are based on Vedic knowledge —
that God can incarnate in the form of a sacred mountain, like Kailash, in the form of a sacred lake,
for example, the lake in Tibet near Lhasa is considered to have a great goddess sleeping there who gives life.

Uh, that in powerful trees, in places of power all over the world, including Ukrainian ones —
that is, God manifests in many places of power that He Himself created.
That is, there the presence of God is greater than elsewhere.

And what should we do? Even in Holosiivskyi forest you can see a huge old oak.
This is also a manifestation of the divine, because this oak has stood for centuries, God Himself grew it and He is present there.

So what do we do? We take and circumambulate this oak clockwise.
And immediately the same power, the higher forces put into you the same power that this oak has.
That is — a part of the deity, a part of Brahman, divine light appears in the person.
We walked around the oak — and such power is turned on in us that God gave to this oak.

We circumambulated a sacred mountain — we are given the same power as that mountain has.
We circumambulated some sacred temple — we are given the same power as that temple has.

Circumambulated a sacred lake — and we are given the power of the goddess who, according to belief, rests in this lake.
We circumambulated Kailash — the power of Kailash is transmitted.

By the way, it is a pyramidal mountain — the highest pyramid in the world, as they say, over 6000 meters high.

That is — around any sacred place they do kora.
Even around a tree in the forest, any of our sacred places in the Carpathians, in Tovtry — do kora around it and higher forces give enlightenment.

Uh, that is the meaning of kora.

It is enough to go around once, but some people go around three, five, seven times,
and some people already go around 108 times.
Well, those are already serious people who really want enlightenment.

Thank you, Mr. Ihor.
Until the end of January, what trials do you think still await Ukrainians?

Well, our trials are only these: they will try to destroy our energy system.
Our energy workers will try, uh, to restore it so that people still receive light and heat.
Uh, that is, there will be this confrontation.
By the way, by the end of January it should already be felt much less, because at the end of January, according to meteorologists' forecast,
there will already be a new cyclone. It will be –2, –1, +1, +2 at the end of January.
This is no longer as scary as –18.

And they strike when there are strong frosts — to freeze us.
When there are no frosts — they have no sense in striking.
Therefore I think that at the end of January all these attempts to destroy our energy system will decrease.

And in the world there will already be events that destroy the economic model of the Russian Federation at the international level.
I think there will be destruction both through the loss of Iran, and through the loss of Cuba, by the way,
and other allies of the Russian Federation — they will change their political system,
and then the Russians will be left without money, they will have no choice, they will not be able to finance the war.

Uh, and therefore this is positive for us.
Well, and the fact that regimes in the world will change — yes, they will.
You see that many countries…
Venezuela used to be a prosperous state. Now it is returning to that.
Iran before the revolution, when there was the Shah — was a prosperous, very rich secular state. And it will return to that.
And all other countries that are now under dictators — they are returning to the state they once were in.

That is — the past is being restored, that which was destroyed as a result of the planetary night, is returning.

Uh-huh.

Thank you, Mr. Ihor.
And I also want to remind you that on January 30 we are organizing a meeting.

This is a meeting on elemental magic. It is a very wonderful opportunity, both online and offline,
to meet Mr. Ihor Mekheda, to study working with elements.
And there is already information under this episode. You can register to participate.
Our prices are quite affordable.
And the class will take place in Kyiv from 11:00 to 16:00 with a short break.
For everyone who wants to participate online — there will be an opportunity to watch the recording,
and to participate directly in online format.
Also Mr. Ihor will answer the questions asked. There will be both theory and practice.

Mr. Ihor, tell us in more detail what will be there.

The thing is that we will study the elements.
In fact there are 10 elements.
Four earthly ones — water, air, earth and fire. These are earthly elements.
And there are also cosmic elements, for example time and others. There are 10 of them in total.
We will look at each element — what it is like in the universe.

And what are elements? The thing is that there is some divine world beyond our universe.
Some divine, spiritual world, so to say,
and there is the material world, the one we can touch with our fingers.
The material world was created by the Great Mother of the Worlds.
Well, this is also an incarnation of the Absolute. This is His manifestation.
The Great Mother of the Worlds, the goddess of fertility — she created the material world.
She is its mistress. She is the owner of this world.

And the elements that she created help her create the material universe.
The entire material universe — both external and internal inside us — consists of elements.
And how to understand these elements, unite with them and launch them for realization,
so that we can realize our spiritual potential in the material world and interact with it.
How to embody it?
That is what we will be studying.

Thank you, Mr. Ihor, for agreeing to this meeting.
Traditionally once a month we meet with Mr. Ihor Mekheda, we go through training.
There will be both theory and practice, I emphasize.
Therefore, please register now, we will be glad.
In the video description there is a link to the magical chancellery.
Contact them.
If they don’t respond to you in the magical chancellery within 6 hours — it’s not because they don’t see your message,
but because there is no internet. Don’t worry, we will register everyone who wants.

I hug everyone. Take care of yourselves and your loved ones.
